NPDES Inspection Escrow is a fund created to pay for the periodic (sometimes weekly) inspections, and if necessary - corrective action, to ensure adequate erosion control. After vegetation is established on disturbed areas and final inspection approval is given, the escrow balance (less the cost of the inspections) is returned to the issuer. Inspections are performed by Scott Soil and Water as they determine necessary. Escrow balances are refunded to the applicant unless otherwise directed in writing from the applicant.

Administration Fee may include wetland fund fee, LGU review, and township engineer review.
